PROFILE

UI developer focused on creating accessible, usable experiences with clean and modular code.

EXPERIENCE

Front-end Developer, Lonely Planet; Franklin, TN Aug 2015 - Present

Contributed to and influenced construction of Backpack, the next iteration of the popular design system Rizzo. As a member of the core product team, assisted in building various experiences on the new LonelyPlanet.com using Node.js and React.

Front-end Developer / Director, Paramore The Digital Agency; Nashville, TN Sep 2008 - Aug 2015

Roles and responsibilities changed during tenure; began as a web designer / developer and transitioned to managing the front-end development department. As designer / developer, designed and built marketing websites using PHP-based content management systems. As director, focused on mentoring a small team, initiating new technologies and methods, maintaining code quality and efficiency, and assisting in leading the direction of the company.

Web Developer, Zoltun Design; Pittsburgh, PA Mar 2007 - Sep 2008

Translated visual designs into HTML, CSS and JavaScript which were then connected to an ASP.net back-end. Worked alongside a back-end developer and visual designer.

Web Developer, Informatics Studio; Pittsburgh, PA Jun 2006 - Mar 2007

Turned visual designs into HTML and CSS templates.

EDUCATION

The Art Institute of Pittsburgh, Pittsburgh, PA; B.S., Interactive Media Design Dec 2006

SKILLS

HTML

CSS (pre- and post-processors)

JavaScript (vanilla, various frameworks/libraries, build tools, templating)

Git
